Keywords: *Training; Publish or Perish; Islamic Religion Counselor*

Abstract: *The purpose of this paper is to report court activities in the form of PoP training activities for Non-PNS Islamic Religious Counsellors in Sambas Regency. The service report method uses descriptive qualitative with three stages, namely planning, implementation and evaluation. The results of community service activities show that Non-PNS Islamic Religious Counsellors improve their ability to find empirical data, this ability certainly has an impact on the ease of making papers as coursework. This is evidenced by the results of the pretest and posttest showing an increase in ability, with an increase of around 21 percent*

Abstrak

Tujuan tulisan ini untuk melaporkan kegiatan pengabdian dalam bentuk kegiatan pelatihan PoP pada Penyuluh Agama Islam Non PNS Kabupaten Sambas. Metode laporan pengabdian menggunakan kualitatif deskriptif dengan tiga tahap yaitu perencanaan, pelaksanaan dan evaluasi. Hasil kegiatan pengabdian menunjukkan Penyuluh Agama Islam Non PNS meningkatkan kemampuan mencari data empiris, kemampuan ini tentunya berdampak pada kemudahan dalam membuat makalah sebagai tugas kuliah. Hal ini dibuktikan dengan hasil pretest dan posttest menunjukkan terjadi peningkatan kemampuan, dengan kenaikan sekitar 21 persen

Kata Kunci: *Pelatihan; Publish or Perish; Penyuluh Agama Islam*

INTRODUCTION

Collaboration between the Islamic Guidance and Counselling Study Programme, the Faculty of Dakwah and Humanities at IAIS Sambas, and the Indonesian Ministry of Religion, Sambas Regency, in the fields of education, research, community service, and human resource development. One of the realisations of this agreement was through the Publish or Perish training activities, in which participants were non-PNS Islamic Religion Extensionists in Sambas Regency with student status.

Publish or perish (PoP) is now a lifestyle for researchers¹. Publish or perish is a solution for finding research problems.² PoP is defined as pressure within academic disciplines to frequently publish research papers in scientific journals in order to maintain and advance one's career³.

Writing and drafting journal articles requires training. An article is simply divided into three areas: the introduction, the main body, and the conclusion⁴. As editors or reviewers of an article or student work, Gottlieb and Utesch get many contributions. However, according to them, several articles lacked structure and clarity. PoP helps structure their articles and provides clarity to readers⁵. Thus, it is hoped that through this training, non-PNS Islamic religious counsellors in Sambas Regency will have the ability to use POP, which aims to find empirical data in papers, journals, assignments, proposals, and theses. Based on the explanation above, the author feels it is important to report the results of community service in the form of a scientific article with the title "Publish or Perish Training for non-PNS Islamic religious counsellors in Sambas Regency."

METHOD

This research method uses a descriptive qualitative approach and borrows descriptive statistical procedures; this is supported by a service report⁶. In addition, researchers in the field of community service also often use planning, implementation, and evaluation methods in reporting the results of their community service, such as⁷. Data collection techniques using documentation and questionnaires The location of this dedication is at the Da'wah and Humanities Faculty of IAIS Sambas. This activity involved nine Sambas Regency Islamic Religion Counsellors. This

community service activity is a joint agreement with the Sambas Ministry of Religion regarding increasing Islamic religious extension resources.

RESULT

The activity begins with identification (the pre-test results show that PAI is not able to find relevant empirical data; $n = 59$, which is not good); Islamic religious instructors have never participated in published or perish application training. Training objectives: to improve the ability to search for relevant empirical data to make it easier to write papers, journals, proposals, and theses. Material planning (this training material is an introduction to POP, installing POP, and the stages of using POP). Tools and materials (laptop, data package, Google website, PoP application).

The form of this activity is training to find scientific information using the publish or perish application. The stages of the activity are that the speaker explains the PoP application, then the participants download the PoP from the official website, then they install the PoP. The final stage is operating the POP.

The post-test results showed that the ability to search for relevant empirical data increased to $n = 80$ (very good). The following is some documentation of POP training activities involving non-PNS Islamic Religious Extensionists in Sambas Regency. The findings of this study are supported by the report ⁸, Specifically, the results of the training evaluation show that participants are proficient in using PoP applications, searching for literature reviews, organising literature reviews, and storing metadata to create scientific papers.

CONCLUSION

Non-PNS Islamic Religious Counsellors benefit greatly from this community service activity, which helps them to improve their ability to search for empirical data; this ability certainly has an impact on the ease of making papers for coursework. The pre- and post-test findings show an increase in ability, with an increase of around 21 percent.
